**FOR IMMEDIATE RELEASE**

## **RADIANT PHARMACEUTICALS EXPANDS DISTRIBUTION PARTNERSHIP WITH GENWAY BIOTECH; COMPANY TO COMMERCIALIZE RPC'S ONKO-SURE CANCER TEST IN RUSSIA AND FORMER SOVIET REPUBLICS**

---

**(TUSTIN, CA) April 9, 2010/Marketwire** – Through its US-based subsidiary AMDL Diagnostics Inc., Radiant Pharmaceuticals Corporation (RPC) (NYSE - AMEX: [RPC](#) - [News](#)) announced today it has extended its partnership with GenWay Biotech Inc., signing an exclusive 5-year marketing, sales and distribution agreement with GenWay Biotech Inc. for the commercialization of RPC's Onko-Sure™ *in vitro* diagnostic cancer (IVD) test in Russia and the former Soviet Republics.

Under the terms of the agreement GenWay Biotech is responsible for the marketing and product sales in this new market. Radiant Pharmaceuticals signed a similar agreement with GenWay Biotech earlier this year which gave GenWay Biotech the exclusive rights to market, sell and distribute Onko-Sure in seven other international markets.

Today's announcement marks the second Onko-Sure distribution agreement RPC signed this week and is a part of RPC's aggressive strategy to further commercialize Onko-Sure in key international markets with strong demand for cancer screening, diagnostic and monitoring tests. According to Douglas MacLellan, Chairman and CEO of Radiant Pharmaceuticals, "I am extremely pleased with the most recent progress we've made in locking down distributors for Onko-Sure. GenWay is a key partner to RPC and we anticipate strong product sales through their extensive sales network in Russia and surrounding regions."

GenWay will penetrate this market with the support of a dedicated sales and marketing organization for Onko-Sure. MacLellan continued, "We have already established a productive, revenue-generating partnership with GenWay for various other international markets and will continue pursuing additional partnerships new markets."

According to Sergey Sikora, Vice President of Business Development for GenWay Biotech Inc., "We are very pleased to expand our work with Radiant Pharmaceuticals to include Russia and the former Soviet Republics. Our focus is on aggressive product sales to well-known hospitals and cancer clinics in this market."

Onko-Sure is a simple, non-invasive, patent-pending and regulatory-approved *in vitro* diagnostic test that enables physicians and their patients to effectively monitor and/or detect certain types of cancers by measuring the accumulation of specific breakdown products in the blood called Fibrin and Fibrinogen Degradation Products (FDP). FDP levels rise dramatically with the progression of cancer. Onko-Sure is approved by the US FDA for the monitoring of colorectal cancer and by Health Canada as a lung cancer screen and cancer monitoring tool.
